

Play Dough Constellations

Activity:

Learn about constellations either from a library book or the internet. You can then help your child make their own constellations by placing either paper or glow in the dark stars onto the playdough.

Supplies:

- Blue or black play dough or black construction paper
- Plastic glow in the dark stars or cut out stars from white paper
- Library book about constellations or device with internet access to learn about constellations

Instructions:

1. Read about constellations either in a book or online
2. Roll out the play dough to make the sky in outer space (if you have play dough)
3. Choose a constellation and re-create it by placing the stars onto the play dough or black construction paper
4. Ask your child how many stars are in their constellation
5. Repeat with a different constellation
